About Me

A highly motivated software engineer with a Bachelor's degree in Software Engineering from the University of Hail. I possess a strong foundation in both front-end and back-end development, specializing in Python, HTML, CSS, and the Django Framework. I am passionate about leveraging technology to develop secure, efficient, and user-friendly solutions. My goal is to apply my expertise in software development and problem-solving to contribute to innovative projects, enhance system performance, and support the operational excellence of a leading organization such as Alinma Bank.

Experience

Hail Region Municipality | Tamheer

Program: Software Engineer (6 months,
Current Position)

- Software and applications development.
